

**Löse jede Aufgabe.****Antworten**

- 1) Lisa's school sold 522 dollars in raffle tickets. If each ticket cost 3 dollars, how many tickets did they sell?
- 2) Jakob had 222 baseball cards in 6 binders. If each binder has the same number of cards, how many cards are in each binder?
- 3) The ring toss game at the carnival made 273 dollars in 7 days. If they made the same amount of money each day, how much did they make per day?
- 4) Katharina bought 512 bottles of water when they were on sale. If she drank 4 bottles a day how many days would they last her?
- 5) Nina had 618 quarters. If it costs 6 quarters for each coke from a coke machine, how many could she buy?
- 6) Julia had 396 pennies. If she put them into stacks with 9 in each stack, how many stacks could she make?
- 7) At the carnival, 4 friends bought 868 tickets total. If they each bought the same amount, how many tickets did each person buy?
- 8) Laura received 845 dollars for her birthday. Later she found some toys that cost 5 dollars each. How many of the toys could she buy?
- 9) An ice machine had 273 ice cubes in it. If you were filling up 7 ice chests and each chest got the same number of cubes, how many ice cubes would each chest get?
- 10) Paul had 936 pieces of candy. If he split the candy into 9 bags with the same amount of candy in each bag, how many pieces would each bag have in it?
